INCORPORATE UNDER COMMISSION FORM

SO LONG as the Bonanza confined its criticisms of the board of county commissioners to generalities there was no rupture in the personal relationship between the members of the board and the critic. The generalities did not seem to reach the spot, to pierce the hide, as it were. But the members fairly writhed yesterday when the Bonanza quoted in exact language a business man whom the neglect by the board had almost forced from the town after he had paid \$560,000 in wages, taxes and supplies, and prepared to build greater.

There is really no necessity for further argument in this matter. The adjustment is very simple. Let the proper steps be taken to relieve Tonopah of the burden placed upon it by the so-called town government. The present board of commissioners would probably do fairly well if they would simply attend to county matters. Nobody alleges they are grafters or anything of that sort. Both Mr. Marsh and Mr. Davis put this question up to the Bonanza last evening and they were honestly answered in the negative. They would have plenty to do looking after roads and such matters and Tonopah would be relieved of their bungling, but doubtless honestly intended, efforts to do what nature did not fit the mfor doing and which other conditions make too burdensome a task for them.

The business people, who are so unanimously dissatisfied with the present form of town government, could then take immediate steps to establish a commission form of government, and all would be serene. In conclusion the Bonanza assures the three county fathers that it does not charge them so much with sins of commission, as with evils of omission. They are simply trying to sail the boat without even having taken a correspondence course in navigation.

COUNTY'S WEALTH AUGMENTED

THE assessment roll figures, as presented by Assessor Charles L. Slavin to the county board of equalization and published in yesterday's Bonanza, tell a big story. Nye county has a grand total assessment of \$7,238,830.18. This is nearly a million and a half dollars more than the total a year ago, due to improvement in conditions, growth in industry, care in assessing and changes made by the state tax commission. The result of these circumstances combined is cause for congratulation. It is but a few years since Washoe and Elko, the two richest counties in the state, fell below this figure, and it will be but a few years more when Nye will also enter the eight figure list.

SAVING MINERAL WASTE

UP TILL quite recent times, the loss of tin at the Welsh mines has been nearly 10 per cent of the total amount of the metal mined. Now, by the use of electrical apparatus, that loss has been lowered to 1 per cent, says the Helena Daily Independent.

This is a fair sample of the reform now going on in all mining operations. Ores once thrown away are now used, and old dumps are being worked at a profit sometimes not much less than was made by the original owners of the mine. The silver mines of Attica were worked by slave labor more than twenty-five centuries ago and were thought exhausted, but in recent times the ancient waste has been run through modern processes and made to pay.

There are some places, however, where the waste is final. It is estimated that one-third of the gold and silver of the great Comstock lode was thrown away, and only a little can be recovered. Some authorities, doubtless pessimists, declare that for every five tons of coal used in industry in this country, two tons are wasted at or near the mine, lost in mining. Some of the finest natural gas wells on the continent "blew" their treasures into the air for days, weeks or even months before being capped.

Agricultural land, rightly used, renews its fertility year after year, and produces as good crops after forty centuries as when first put under the plow. The mine has only one crop. All the more need that this crop shall not be wasted.

CLIPPED AND CREDITED
